

Getting CFNC.org to work with Norton Internet Security

If you use Norton Internet Security (NIS) on your computer, you must make a configuration change to your privacy controls in order to use the CFNC.org site properly.

These changes must be made under the NIS Supervisor account.

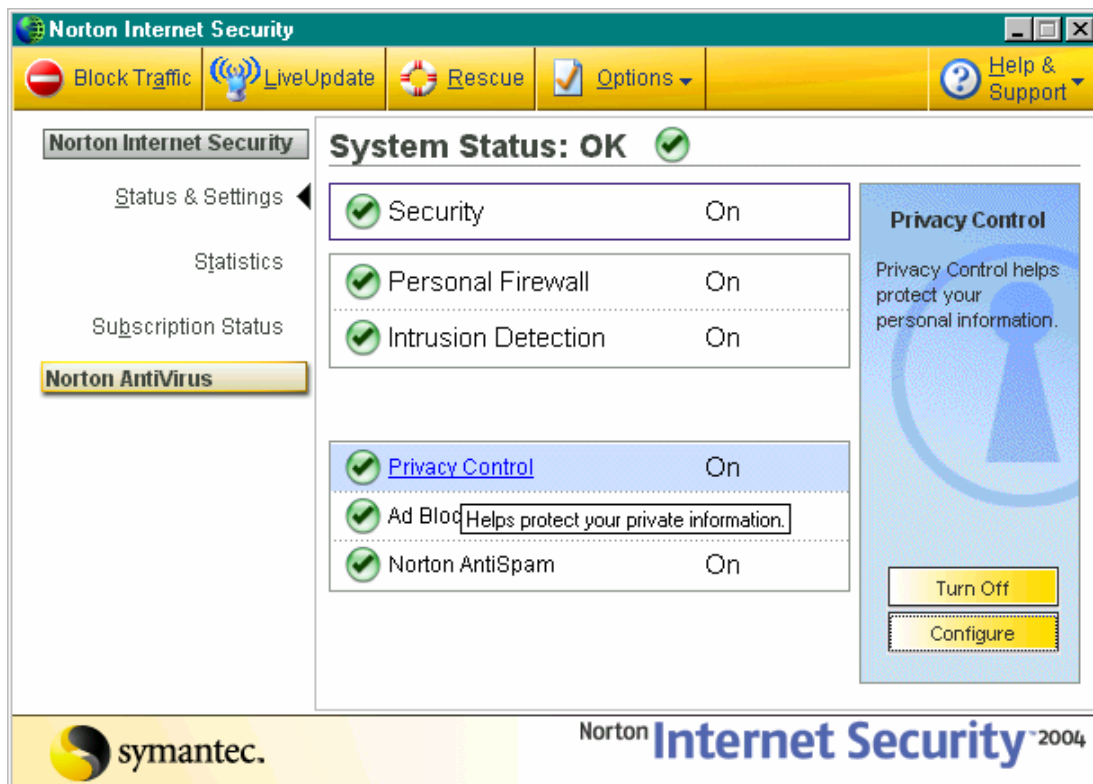

To make the changes, perform the following steps....

- 1) Open Norton Internet Security by clicking on:

Start -> Programs -> Norton Internet Security -> Norton Internet Security.

The main Norton Internet Security window should display.

- 2) Click on "Privacy Control" in the lower half of the screen. (You should see the pane on the right hand side of the screen change so that it looks like the picture below.)

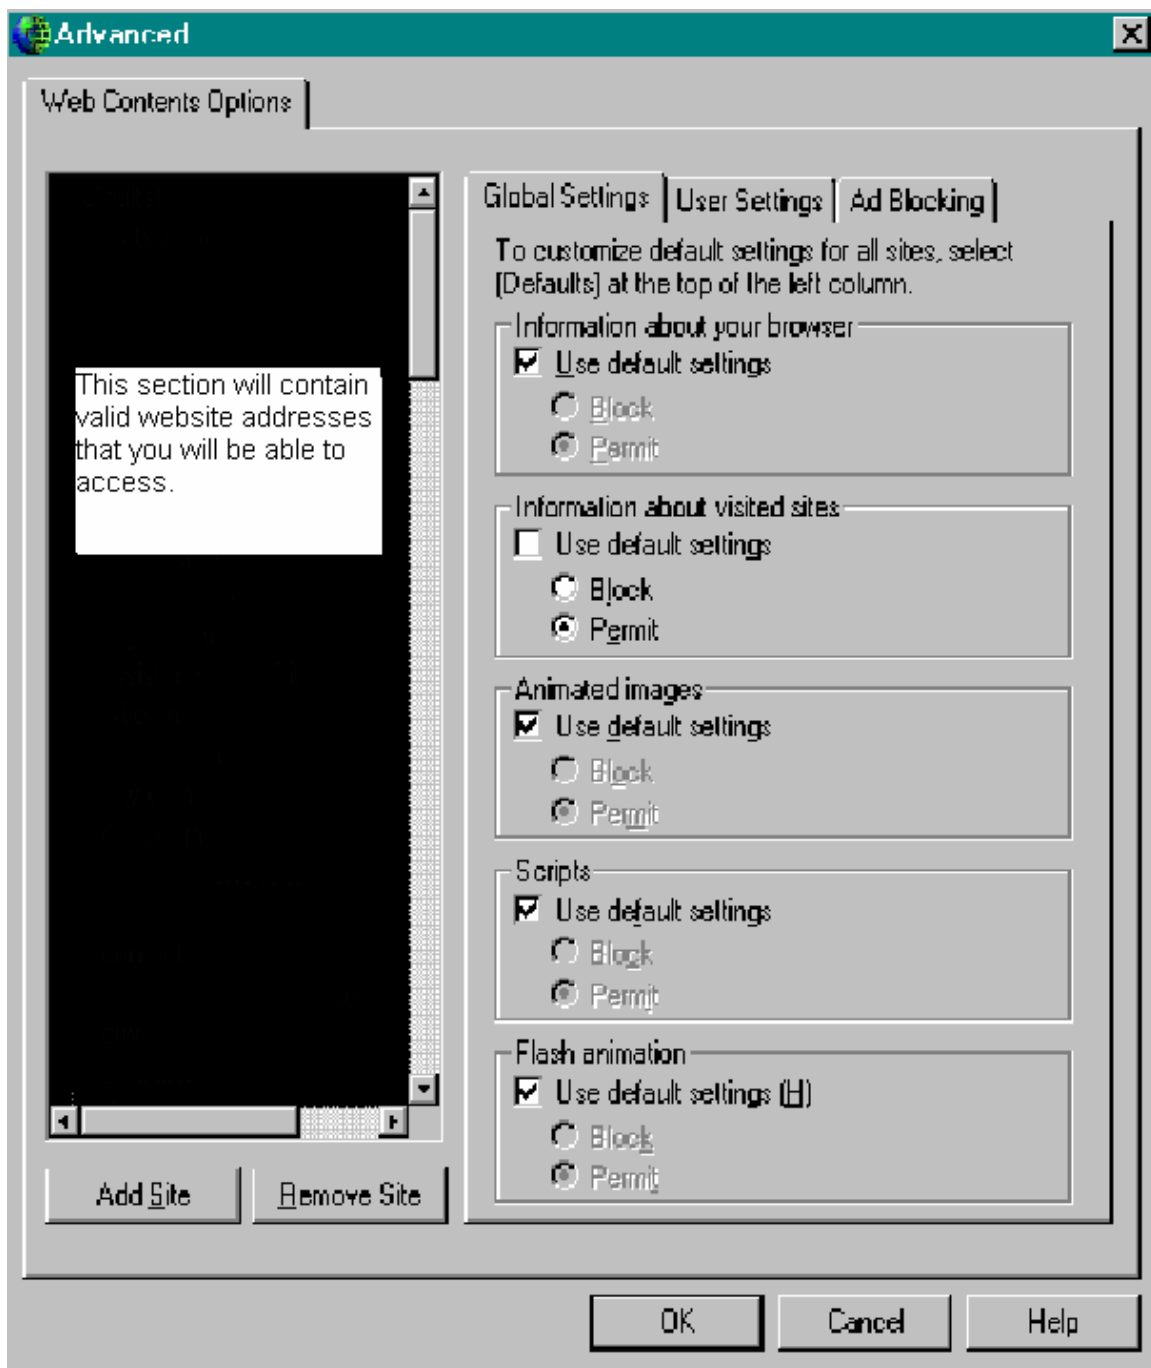

- 3) Click on the “Configure” button in the lower right hand corner.

The following screen should display:

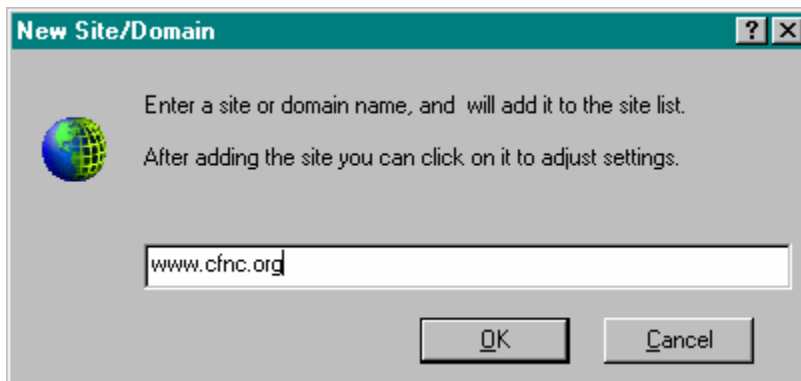

- 4) Click on the “Advanced” button.

The following screen should display:

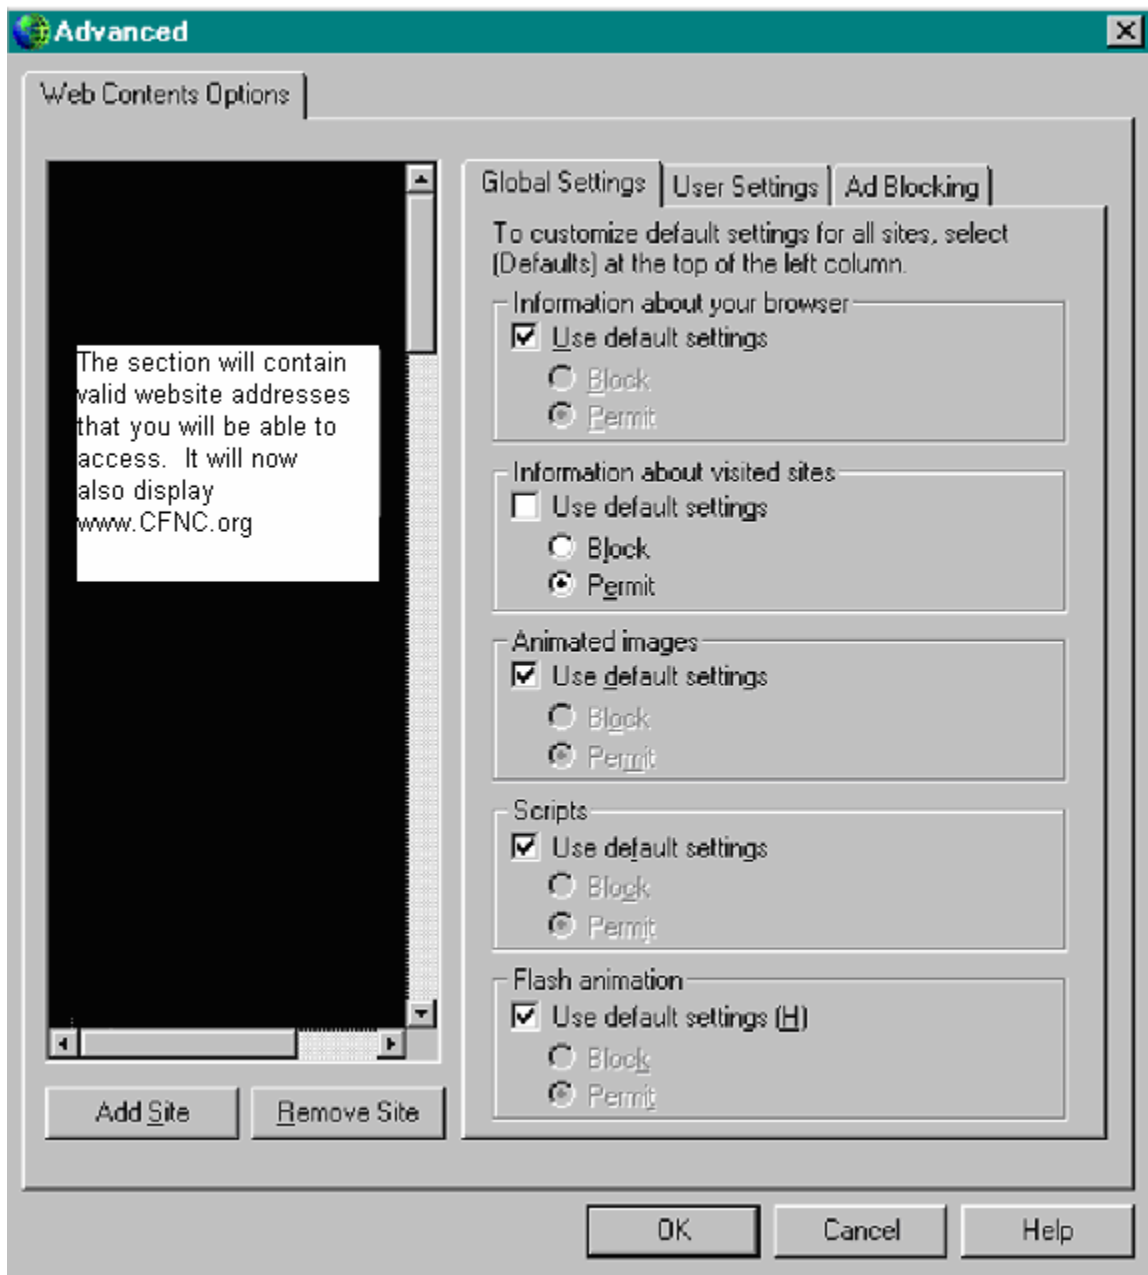

- 5) Click on “Add Site” in the lower left hand corner of the window.

The following screen should display:

- 6) Type in www.CFNC.org as shown, then select the “OK” button.

7) The following screen should display:

- 8) After you have added the www.CFNC.org site, scroll down in the list under the “Web Contents Options” tab and highlight it.
- 9) On the “Global Settings” tab, under the “Information about Visited Sites” section, uncheck the “Use Default Settings” box. Select the “Permit” radio button.
- 10) Click “OK” to save your settings. Exit out of Norton Internet Security. The CFNC site should now function properly.
